

## Meeting Notes 23<sup>rd</sup> February 10:30-11:10

### Agenda:

- Laying out the next sprint
- Adding story points to the cards
- Breaking up the front end into separate specifications.

Time: 10:30-11:10

Date: 23/02/2023

Present: Benjamin Theron, Daniel Glider, James Andrew, Louis Lusso, Oliver Medzinskii

### Discussion points:

- Who is doing what over the next week (first sprint)
  - As Oliver Medzinskii has experience with UI design it was decided he would focus on that and asked for help from others where needed. The other four would mainly be focussing on the back-end of the application and would aim to get as much done as possible by the next meeting.
- What can the front end be broken down into?
- The number of story points for each card.
  - This was decided unanimously with everyone writing down a score for each card and then the group coming to a joint decision.
