

Meeting Notes 27th February 13:30-14:00

Agenda:

- Path for the final week of the sprint

Time: 13:30-14:00

Date: 27/02/2023

Present: Benjamin Theron, Daniel Glider, James Andrew, Louis Lusso, Oliver Medzinskii

Discussion points:

- How to end the sprint and finalised what needed to be done.
 - This included the prioritisation of the backlog and which cards needed to be implemented before the presentation.
- How location could be entered into the application in a simple format before the end of the sprint.
 - This has become a technical debt of the sprint and now three members of the team have attempted to implement it. In order to get a working prototype ready for the presentation this may have to be simulated for this sprint.
- Sorted out some migration errors occurring with the database.
 - These errors had led to some members not having full functionality of the project and were fixed so all members were able to continue.
