

Meeting Notes 2nd February 15:30-16:00

Agenda: Initial Ideas and planning.

Time: 15:30-16:00

Date: 02/02/2023

Present: Benjamin Theron, Daniel Glider, James Andrew, Jonathan Parker, Louis Lusso

Discussion points:

- Initial ideas and meeting the team members.
-
- Ideas for the project included:
 - An interactive exploration of the University of Exeter campus to learn about sustainable activities performed around the university as well as viewing certain ecological sites around campus.
 - An application encouraging students and staff to take sustainable methods of transport around campus. This includes providing a carpool section to the application, displaying public transport times and locations to users and displaying how much more sustainable it would be to walk or cycle rather than drive.
 - An application encouraging users to perform sustainable activities around campus such as picking up litter, turning off lights and closing windows. This will reward users for performing these activities and provide them with points for doing so, which would rank them on a leaderboard.
